What Is Automated Trading.

This is the act of trading the FOREX/ COMMODITIES market using a trading software that allows individual retail traders or institutional traders to experience automated analysis of the market, as the trading software automatically suggest the initiation of a trade or even executes the trade leveraging the programmed strategy.

How Can I Use It

it's easy! Just like any other software you have ever used, you simply install it on your trading terminal using your PC. once installed and hosted on your VPS the software starts analyzing the market the for trade opportunities.

What Is a VPS And it's Importance:

A VPS is a virtual private server that enables your trading software trade uninterrupted; it's just like owning a personal computer in the cloud with constant power supply and uninterrupted data to power your trading 24/7. Interestingly, it is very affordable as most companies that offer VPS services allows purchase between \$10 to \$12 monthly subscription.

The Trading Softwares

We presently have the this phenomenal trading softwares:
